NAME- ARCHNA

DATE: 13/02/2018

HUID: 100871473

Advice:

- 1 Tab Duphaston 10 mg twice daily x 14 days  —
2. Tab Folvite 5 mg once daily x 14 days. —  —
- 3 Tab Ecospirin 75 mg once daily x 14 days. —  —
4. Tab Progynova 2 mg thrice daily x14 days —  —  —
5. Tab. Dexta 0.5 mg OD HS x 14 days (AT NIGHT DAILY) —  —
6. Cap. Susten 400 mg twice x 14 days (VAGINALLY)   (200)
- 7 .Inj Susten 100 mg I.M alternate day x 14 day —  —  —

There are no special precautions that need to be taken, but avoid strenuous activity. Try to be mentally physically relaxed as much as possible. You can return to work if you wish, but you may prefer to have a few day rest.

There is no evidence of any extra measures that could positively influence the outcome of your treatment.

Please do your blood test for pregnancy-serum beta HCG on- 26/02/18

Please contact us if you experience any of the following symptoms:

1. Heavy or irregular bleeding
2. Any temperature or feeling generally unwell.
3. Pain in your tummy . Swelling of your tummy with a feeling of being bloated
- 4 Any problems with passing urine: particularly if you see that it is becoming more concentrated than usual and You are not needing to pass urine very often.
- 5 Any diarrhoea.
- 6 Feeling faint or light headed.
