FORM B

(See Rules 5(2), 5(3) and 5(4))
CERTIFICATE OF REGISTRATION
(To be issued in duplicate)

1. In exercise of the powers conferred under Section 19 (2) of the Pre-natal Diagnostic Techniques (Regulation and Prevention of Misuse) Act, 1994 (57 of 1994), the Appropriate Authority, GORAKHPUR hereby grants registration to the Joint Centre named below for purposes of carrying out Genetic Counselling/Pre-natal Diagnostic Procedures/Pre-natal Diagnostic Tests/ultrasonography under the aforesaid Act for a period of five years ending on Jun 7, 2027.

2. This registration is granted subject to the aforesaid Act and Rules thereunder and any contravention thereof shall result in suspension or cancellation of this Certificate of Registration before the expiry of the said period of five years apart from prosecution.

A. Name and address of the Joint Centre: **INDRA WF HOSPITAL PVT. LTD., 1st & 2nd Floor, Trimurti Plaza, 8-Park Road, Opp, Bismil Park, Mohalla-Ara, Chavani, Gorakhpur, Uttar Pradesh-273001.**

B. Pre-natal diagnostic procedures* approved for (Genetic Clinic):

Non-Invasive :

I. Ultrasound

Invasive

II. Amniocentesis

III. Chorionic villi biopsy

IV. Foetoscopy

V. Foetal skin or organ biopsy

VI. Cordocentesis

VII. Any Other (Specify)

Preimplantation Genetic diagnosis

C. Pre-natal diagnostic tests* approved (for Genetic Laboratory):

I. Chromosomal Studies

II. Bio-Chemical Studies

III. Molecular Studies

D. Any other purpose (please specify):-

3. Model and make of equipments being used (any change is to be intimated to the Appropriate Authority under rule 13).

4. Registration No:- **P.N.D.T./07/D.M./C.M.O./G.K.P./2022**

5. Period of validity of earlier Certificate of Registration.
(For renewed Certificate of Registration only) From To

Signature, name and designation of
the Appropriate Authority with Seal

Date: 26/08/2022
Place: GORAKHPUR

*Strike out whichever is not applicable or not necessary.

ULTRASOUND STUDY OF PELVIS

Two intrauterine gestational sacs are seen.

Foetal poles and yolk sacs are well visualized in both sacs.

Good cardiac activity is seen in foetal embryos.

FHR 1 : 124 bpm. FHR 2 : 130 bpm.

CRL 1: 0.37cm 6 weeks 0 day.

CRL 2: 0.54cm 6 weeks 2 days.

Both adnexa appear normal.

IMPRESSION:

- Twin live intrauterine pregnancy of gestational age 06 weeks 00 day and 06 weeks 02 days.

I have neither detected nor disclosed the sex of her fetus to anybody in any matter.

16.0 - 21.0 Weeks	18.0 - 23.0 Weeks	4720 - 80100
21.0 - 39.0 Weeks	23.0 - 41.0 Weeks	2700 - 78100

Used for : Early detection of pregnancy, Investigation of suspected ectopic pregnancy or other pregnancy-related complications and Monitoring in vitro fertilization patients.

-Values between 5 and 25 IU/L (mIU/mL) are indeterminate for pregnancy. Consider confirming with repeat test in 72 hours. Values in pregnancy should double every 3 days for the first 6 weeks.

-Elevated concentrations of human chorionic gonadotropin (hCG) are observed in normal pregnancy, but may serve as an indication of choriocarcinoma, hydatidiform mole, or multiple pregnancy.

-Decreasing hCG concentrations indicate threatened or missed abortion, recent termination of pregnancy, ectopic pregnancy, gestosis or intrauterine death.

-Both normal and ectopic pregnancies generally yield positive results of pregnancy tests.

The comparison of quantitative hCG measurements with the results of transvaginal ultrasonography (TVUS) may aid in the diagnosis of ectopic pregnancy. When an embryo is first large enough for the gestation sac to be visible on TVUS, the patient generally will have hCG concentrations between 1,000 and 2,000 IU/L (mIU/mL); but these values may vary. If the hCG value is this high and no sac is visible in the uterus, ectopic pregnancy is suggested.

-Peri- and post-menopausal females may have detectable hCG concentrations (<7 IU/L or mIU/mL) due to pituitary production of hCG.
