

From

Ms. Shahnaz Ansari
Civil Judge (Jr. Div)/JM
Faridpur-Bareilly

To,

Asst. Registrar(Services)
Hon'ble High Court of Judicature at Allahabad
Allahabad

Through Ld. District Judge Bareilly.

Sub: Request for stay of transfer at Bareilly on medical grounds.

Respected Sir

1- Reference is made to Hon'ble High Court letter No C.L. No.23/Admin. (Services)2019 dated 23 September 2019.

2- With Utmost reverence, I Humbly submit that i was initially posted to Bareilly Judgeship vide Hon'ble High Court Notification dated 11-01-2017. Vide Hon'ble Hingh Court Notification dated 14-02-2017 I was transferred to faridpur outline court of Bareilly and presently working there.

3- My mother salma Begum aged about 57 years is suffring from serious Arthritis ailment at an advanced stage and is not able to move properly. She is residing with me at govt accomodation J-5 Judges colony Bareilly. She is undergoing treatment previously at Mission Hospital Bareilly and currently at sai Sukhda Hospital Bareilly under the care of Senior orthopediac Dr. Fahad Hamid. Due to Non fluid, the Doctor has adivsed my mother for complete bed rest and also for knee replacement surgery.

4- My Father aged about 65 years is also a diabetic patient. My father along my brothers owns a business shop at tehsil tilhar district Shahjahanpur. In recent past due to non avialability of better medical facility at tehsil tilhar, I brought my mother to bareilly for her medical

treatment and care and it has been advised that she will have to undergo prolonged treatment and has to undergo routine Physiotherapy under the guidance of a Physiotherapist which is not possible at my home place tehsil tilhar.

5- At this critical juncture and in hours of need my mother is dependant on me for all sorts of help for her treatment and care.

6- In view of the above eluciadated facts, I humbly request that if my request for stay of transfer at Bareilly is considered, it will prove to be a great help to my aged ailing monther as well as for me and thus i shall be able to discharge my duties effectively and simaltaneously i shall be in a poşition to take care my mother in her old age. Therefore I entreat that my representation be put up before the Hon'ble court for kind and sympathetic consideration of my earnest request for stay of transfer at Bareilly.

7- If the Hon'ble court does not accept my request for stay of transfer at Bareilly, it is my humble request that i may transferred near to Delhi and NCR, due to better and advanced medical facilities.

Submitted with great regards.

Dated:- 6-11-19

DEPARTMENT OF RADIOLOGY

Name : MRS. SALMA ANSARI
Age/Sex : 53 YRS/FEMALE
Referred By : Dr.
OPD/IPD : OPD

Date : 30-Nov-18 14:27:40
ContactNo : 8887796552
Lab no. : 200965
Reg No. : 350123
Lab SNo : 9:00 PM

MRI : LUMBO-SACRAL SPINE

IMAGING SEQUENCES (NCMR)
AXIAL : T1 & TSE T2 Wis.; SAGITTAL: T1 & TSE T2 Wis.

Lumbar spine is straightened with loss of usual spinal curvature. There is evidence of degenerative changes affecting lumbar spine. All the intervertebral discs are desiccated. Vertebrae are also showing degenerative changes in form of anterior osteophytosis and signal changes adjacent to end plates.

Small hemangioma is seen at L3 vertebral levels.

Broad base diffuse disc bulge is observed at L5-S1 level producing extradural compression over ventral aspect of thecal sac. Lateral recesses and L5 neural foramina are mildly compromised.

Broad base diffuse disc bulge is also observed at L3-4 level producing extradural compression over ventral aspect of thecal sac but not compressing lateral nerve roots.

Rest of the vertebrae and intervertebral disc are showing normal height, morphology, outline, alignment and signal intensity. No significant disc bulge/herniation or compression over thecal sac/ nerve roots at any other level.

Lower dorsal spinal cord and conus medullaris are showing normal morphology, outline and signal intensity. Cord CSF interface and cauda equina nerve roots are normally visualised. No evidence of primary canal stenosis.

Facet joints and ligamentum flavum are normal.
