

From,

Rohit Singh  
Addl. District & Sessions Judge  
Court No. 16, Kanpur Nagar  
UP 1589

To,

The Registrar General,  
Hon'ble High Court of Judicature  
of Allahabad

Through,

District & Session Judge  
Kanpur Nagar

**Subject - Request cum representation regarding stay of transfer.**

Respected Sir,

Most humbly, I beg to submit that me (Rohit Singh, ADJ, Court No. 16) and my wife (Tanu Bhatnagar, ADJ/FTC Court No. - 41, CAW) have joined this judgeship in the year 2018, that being so, my routine transfer from this judgeship is likely to be considered in the upcoming annual transfer exercise.

Most respectfully, I pray to stay our transfer for one year. Our eight years old only son is suffering from "ADHD" disease. For which presently he is getting occupational therapy from Amrita Rehabilitation Center Kanpur Nagar as advised by Neurologist. Before coming to Kanpur Nagar we had consulted many medical centers but there was no improvement in his condition but after starting his therapy at Amrita Rehabilitation Center his condition has improved very much.

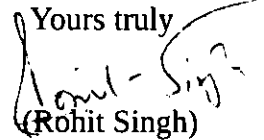

Presently due to Covid - 19 corona virus pandemic we are unable to take him to the center. His occupational therapy is still not completed.

Therefore, I again request you that taking into account the factors above mentioned, kindly stay my transfer for one year in the judgeship of Kanpur Nagar.

For this act of kindness; I shall ever be obliged to you.

With all regards,

Date - 26.11.2020

Yours truly  
  
(Rohit Singh)

Addl. District & Sessions Judge  
Court No. 16, Kanpur Nagar  
UP 1589

## PSYCHOLOGICAL REPORT

<b>Name</b>	Shambho		
<b>Gender</b>	Male		
<b>Date of Birth</b>	17.10.2012	<b>Age</b>	6 years 9 months
<b>Informant</b>	Father		
<b>School/ Standard</b>	Kangaroo Kids / Sr. K.G		
<b>Date of Evaluation</b>	10.07.2019		

### CHIEF COMPLAINTS

Shambho's father reported that he does not concentrate on the task that he is allotted. His hand writing is poor. He engages in irrelevant talking. He gets restless when taken to new place. He does not have established relationship with peers. His initiation and interaction is limited with children.

### BACKGROUND INFORMATION

Shambho's mother had no complications during pregnancy. As reported, he is a full term child, born through caesarian delivery. Birth cry was immediate.

His developmental milestones were age appropriate. He could sit on his own by 7<sup>th</sup> month. He started walking at 13<sup>th</sup> month. He said his first word at the age of 12 months. His speech regressed around the age of 18<sup>th</sup> month, but he started showing progress in speech and language at the age of 2 years.

Telephone : 7851832620 E-mail : amritassc@gmail.com Web-[www.amritassc.org](http://www.amritassc.org)

## SCHOOL/THERAPY HISTORY

Shambho started regular schooling at the age of 2 years 6 months.

His school has been changed once. He has attended K.G Jr. twice.

## OBSERVATION

As observed Shambho is an active child. He made appropriate eye contact. He was not referring to the person whom he was talking to. He was just continuously speaking irrelevantly. When he was asked questions based on certain concepts, he did not give to the point answer rather he was talking around the point. Initially during the assessment the rapport was not established between the assessor and the child but gradually he became compliant. His attention was difficult to arouse and sustain.

## TEST ADMINISTERED

The following tests along with clinical interview and observation were used for the purpose of assessment:

- Vineland Social Maturity Scale- Indian Adaptation.**
- Development Screening Test.**
- ADHD Diagnostic Teacher Rating Scale.**

## ASSESSMENT RESULTS AND INTERPRETATION

### **a) Vineland Social Maturity Scale**

To assess the child's Adaptive Skills and Social capabilities Vineland Social Maturity Test was administered on which he obtained a Social Age (SA) of 6 years with the corresponding SQ of 88, suggestive of low average Socio- Occupational Functioning.

### **b) Developmental Screening Test.**

On Developmental Screening Test, the child obtained a Developmental Age (DA) of 5 years 11 month with the corresponding DQ of 85, suggestive of low average intellectual functioning.

Telephone : 7851832620 E-mail : amritassc@gmail.com Web.-www.amritassc.org

## c) ADHD Diagnostic Teacher Rating Scale

On ADHD Diagnostic Teacher Rating Scale, Shambho meets the criteria for inattention & hyperactivity-impulsivity type.

### CONCLUSION AND RECOMMENDATION

Taking into account the information shared by the child's father, the observation and interaction made during the session indicate that the child does not have learning difficulty. Due to the condition of hyperactivity and inattention he faces difficulty in attending to the task at hand. He also has difficulty to sustain attention and lacks to follow it through.

It is recommended,

- Child should be engaged in activities that involves his thinking skills- such as problem solving and self-control.
- Setting goals for behavior change and following it through with incentives.
- Social training is essential for the child.
- Activities like – listening and narrating incidences and stories
- Include physical activities in everyday routine.

Please feel free to ask for further information.
