

## Laboratory Test Report

Name of Patient : Mrs. MEERA MEHA  
 Age/Gender : 56 Yrs/Female  
 Collected AT : I K PATH LAB  
 Referred BY : Dr. SYED NURUL HASAN  
 Sample Type : EDTA Blood - 20211131  
 Ref Customer :

Test Request ID : 14162103250007  
 Specimen Drawn ON : 25-Mar-2021 03:06PM  
 Specimen Received ON : 26-Mar-2021 10:17AM  
 Report DATE : 26-Mar-2021 11:07AM

### Test Description

### Observed Value

### Biological Reference Range

#### HAEMATOLOGY

HbA1c (ngsp)  
HPLC

11.2

<6: Non diabetic  
 6-7: good Control  
 7-8: weak Control  
 >8 poor Control %

HbA1c (IFCC)  
HPLC

98.65

mmol/mol

Estimated Average Glucose

274.7

mg/dl

#### REMARKS

*In vitro* quantitative determination of HbA1c in whole blood is utilized in long term monitoring of glycemia. The HbA1c level correlates with the mean glucose concentration prevailing in the course of the patient's recent history (approx - 6-8 weeks) and therefore provides much more reliable information for glycemia monitoring than do determinations of blood glucose or urinary glucose. It is recommended that the determination of HbA1c be performed at intervals of 4-6 weeks during Diabetes Mellitus therapy. Results of HbA1c should be assessed in conjunction with the patient's medical history, clinical examinations and other findings.
