Date of Admission:	01/02/2019 10:48:00 AM		
Discharge Summary Preparation Date:	05/03/2019 05:56:30 PM		
Discharge Date:			
Discharge Type :	Regular Discharge		

ICD_Code
 ,F84.0 Description- Autism spectrum disorder, mild Intellectual disability disorder, Mood NOS

Illness Details
 This is a 11 year child with slow to warm up temperament. He had history of poor social and emotional reciprocity, social interaction and social communication deficit, poor self help skills with restricted repetitive stereotype behaviour. New onset behavior was observed in form of aggression, over demanding, irritability and decrease need for sleep from past 2-3 months after change of house and disturbance in structured routine. Associated behavioral issues included eye poking, repetitive behaviors such as cleaning floor and insisting that maid come on time to clean floor, and if she wouldnt he would spill liquid on floor and clean himself , break glass containers.

Family History
 Stays in nuclear family, frequent change of house, adequate parental relationship, emotional atmosphere in home is disrupted due to child s behaviour, discordant relation between child and elder sibling.

Personal History
 Motor milestones appropriate for age, delay in language, speech and cognitive milestones.

Physical Findings
 Wt-64.5 Kg
 BMI-28

Mental Status
 Corroborative with history.

Treatment
 Behaviour interventions
 Speech therapy
 Interventions for ASD.
 T. Lithium up to 750 mg along with aripiprazole 30 mg was started.

Course In Hospital
 Child was admitted for diagnostic clarification. After detail evaluation interventions, a diagnosis of mood episode was made and was started on mood stabilizer. Training inputs were started to improve socialization, shared attention task, pointing, imitation skills, peer play. For communication deficit speech stimulation, parallel talk, naming and labelling choice making sequencing was taught. Behaviour interventions in form of ignoring of tantrums and rewarding positive behaviour was done. Child s mother also had depressive symptoms was started on supportive psychotherapy under unit 1 Adult psychiatry team. T.Lithium upto 600mg/d was started i/v/o hypomanic symptoms, serum lithium was 0.54meq/l, hence Lithium increased to 750 mg. Mother educated about need for structured routine and active interventions for speech stimulation and social deficit and precautions regarding Lithium.

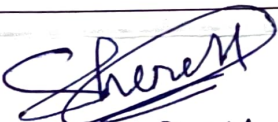

Condition At Discharge
 Improved in terms of behaviour problems and mood features.

Recommendations At Discharge
 To continue
 T.Lithium 300 mg 1-0-1.5
 T.Aripiprazole 10 mg 1.5-0-1.5
 T.Clonazepam 1 mg 0-0-1
 Serum Lithium after 5 day
 Behavior intervention as advised and interventions for social and communication deficit.
 Speech therapy to be continued locally.
 Follow up in CAP 200 OPD on any Monday/Thursday at 9 A.M.
