Test Name	Results	Units	Bio. Ref. Interval
SARS-COV-2 (COVID-19) IgG ANTIBODY @ * (CLIA)	290.00	AU/mL	<12.0

Interpretation

RESULT (AU/mL)	REMARKS	INTERPRETATION
≥ 15.0	Positive	Indicates presence of SARS-COV-2 IgG Antibodies
≥12.0 - < 15.0	Equivocal	Repeat testing after 1-2 weeks is recommended
< 12.0	Negative	Indicates absence of SARS-COV-2 IgG Antibodies

Note

1. Positive test indicates exposure to SARS-CoV-2. ICMR does not recommend this test for diagnostic purposes. It is only for Serosurveillance.
2. Negative test indicates absence of SARS-COV-2 IgG antibodies hence immunity status cannot be established.
3. False positive results may occur due to co-infection with other pathogens like Non SARS-CoV-2 Coronavirus strains such as Corona virus HKU1, NL63, OC43 or 229E.
4. False negative reaction may occur early in the course of the disease or due to variations in viral genes or in immunocompromised patients.
5. Test conducted on serum.

Usage

- Epidemiology/Prevalence studies &/or to facilitate contact tracing
- Identification of potential convalescent plasma donors

Test Name	Results	Units	Bio. Ref. Interval
D - DIMER, QUANTITATIVE @ (Immunturbidimetry)	<0.27	mg/L FEU	<0.50

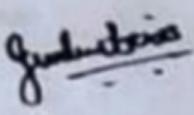

Note

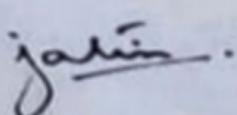

1. Degree of D-dimer increase does not definitely correlate with the clinical severity of associated disease state
2. Increased levels have a high probability of Venous thromboembolism (VTE) and require clinical correlation.
3. Lipemia falsely decreases D-dimer levels
4. Test conducted on Citrated plasma.

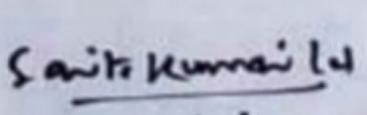

Comments

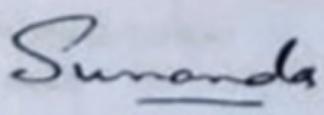

D-Dimer is one of the measurable byproducts of activation of the fibrinolytic system. It assesses fibrinolytic activation and intravascular thrombosis. D-dimer assays are characteristic for Disseminated Intravascular Coagulation (DIC) as this test demonstrates simultaneous presence of thrombin and plasmin formation. It can also be elevated in individuals with large vessel thrombosis, soft tissue hematomas, Pulmonary embolism, recent surgery, active or recent bleeding, pregnancy, liver disease, malignancy and hypercoagulable states. D-Dimer is of particular value in excluding the diagnosis of venous thromboembolism among patients at high risk.

MRI REPORT

NAME: Mrs. Vimla Devi	AGE/ SEX: 67 Yrs/ F
REF. BY: Dr. Ramann Mohan Sharma	DATE: 17.5.2021

MRI BRAIN

Tech: MRI of brain has been performed using T1W, T2W, FLAIR, gradient & diffusion weighted sequences in multiple planes.

Findings:

- ➔ Foci of hyperintense signals on T2W and FLAIR sequences are seen in Fronto parietal lobes, subcortical white matter with no restricted diffusion suggestive of - Chronic microvascular ischemia (Fazekas Grade I) . Changes of age appropriate cerebral atrophy are noted. The ventricular system, basal cisterns and cortical sulci are prominent . Rest of the cerebral neuroparenchyma appears normal. Bilateral basal ganglia and thalami are symmetrical and reveal normal signal intensity. The brainstem and cerebellum appear normal. There is no evidence of cerebellar tonsil ectopia. Corpus callosum appears normal. There is no evidence of sellar widening. Rest of the ventricular system is normal. No abnormal extra-axial fluid is seen. No focal mass lesion is seen. No acute infarct is seen on diffusion sequence . No abnormal susceptibility is seen on gradient sequence to suggest hemorrhage. The grey white differentiation is preserved elsewhere. Major intracranial vessels show normal Flow voids. Limited evaluation of orbits does not reveal any significant abnormality.

Impression: MR Findings are S/o-

- ➔ Foci of hyperintense signals on T2W and FLAIR sequences are seen in Fronto parietal lobes, subcortical white matter with no restricted diffusion suggestive of - Chronic microvascular ischemia (Fazekas Grade I)
- ➔ Changes of age appropriate cerebral atrophy are noted. The ventricular system, basal cisterns and cortical sulci are prominent

Note: - This is only a Radiological Impression & not the final diagnosis. Like all diagnostic modalities, MRI also has its limitations. Therefore MRI report should be interpreted in correlation with clinical & pathological findings.
