

Dr. ARORA'S ULTRASONOGRAPHY, COLOR DOPPLER & DIGITAL X-RAY CENTRE

7, Kripal Colony, Opp. Bhagwan Talkies, AGRA-282 002 Ph.: 2522667

Name of the patient—Myrah

Dated.....25/11/21

Referred by—Self

USG – INGUINAL REGION

There are few enlarged lymph nodes seen in the right inguinal region. The largest one measures about 2.1x0.8 cm in size. Its margins are well defined and regular.

Its echotexture is maintained with well preserved hilum and hilar vascularity.

Few lymph nodes are also seen in the left inguinal region. These measure about 1.3x0.5 cm in size.

IMPRESSION

Right inguinal lymphadenopathy

Adv—Please correlate clinically.
FNAC for further evaluation.
