DEPARTMENT OF NUCLEAR MEDICINE AND PET-CT

NAME	MR. ARVIND MISHRA	AGE/SEX	45 Y/M	DATE:	18.09.2021
REG NO	60057336	REF BY	DR. PRAKASH P. KOTWAL		

Clinical History:- C/o right wrist pain post total wrist fusion (31.07.2021).

Procedure:-

^{99m}Tc MDP Three Phase Skeletal Scintigraphy with SPECT/CT

Sequential dynamic images of pelvic region were acquired in anterior and posterior views immediately after intravenous administration of Tc-99m MDP. Regional flow and blood pool images were acquired after 1 min followed by whole body blood pool images. Regional and whole body delayed images were acquired 3 hrs after tracer administration.

FINDINGS:

- **Regional perfusion and blood pool images:** Increased flow and blood pool in right wrist.
- **Delayed regional and whole body images:** Increased tracer uptake noted in right wrist.
- Physiological tracer uptake is noted in rest of the skeleton.
- Both the kidneys are well visualized and normal in position.

IMPRESSION:

- Increased tracer activity in all phases of bone scan suggestive of RSD.

Dr. ASHUTOSH PARASHAR

MBBS, DNB (Nuclear Medicine)
PDCC (Co-relative Imaging)
Ex. Senior Resident (SGPGI)
Consultant-Nuclear Medicine & PET-CT
