## New Aaditya Diagnostic Centre

Lane No. 17, Ravindrapuri Colony (Near Gopi Radha Girls Inter College),  
Varanasi - 221005

Patient:	MISS PRAGATI	Sex/Age:	27 yrs/F
Ref. Doctor:	Dr. ARCHANA MISHRA	Date:	06/12/2019

### ULTRASOUND BREASTS

Both breasts show fibro-fatty parenchyma with areas of glandular parenchyma.

A well-defined hypoechoic mass of about 12.7 x 12.0 mm is seen in outer upper quadrant of right breast at 9 - 10 O'clock position with minimal internal vascularity and on elastography showing benign characteristics. Surrounding breast parenchyma appears normal.

No obvious skin thickening or nipple retraction is delineated.

No obvious collection or ductal ectasia is delineated.

No obvious axillary lymphadenopathy is delineated.

#### OPINION:

FIBROADENOMA RIGHT BREAST  
FIBROADENOSIS BOTH BREASTS
