

From,

Pooja Suhag
Civil judge junior division IInd,
Baghpat.

To,

The Registrar General,
High Court of Judicature at Allahabad,
Allahabad.

Through,

District Judge,
Baghpat.

Subject- Regarding extension of time in Baghpat Judgeship.

Sir,

With humble submission, the undersigned is taking the opportunity to bring it to your benign notice that I was posted in District Court Baghpat as my first posting and is continuing to serve there only till now as Civil Judge (junior division).

It is further relevant to mention that I am a resident of Bahadurgarh, NCR region, Haryana and my mother has been suffering from medical ailments of which the medication is going on from Delhi hospital currently and surgery would be conducted soon as per doctor reports and I am the only one here to take care of all the formalities. Also, it is pertinent to mention that my only brother is a permanent resident of Australia. So, it leaves only the undersigned to take care of these compelling circumstances.

The Socio-Cultural background to which the undersigned belongs requires me to shoulder the responsibility entrusted upon.

It is in the above background that your goodself is beseechingly requested to kindly allow the undersigned to serve one more year in the district judgeship Baghpat.

Thanking in anticipation.

With profound regards,

Date-

(Pooja Suhag)
Civil judge junior division IInd,
Baghpat.

Enclosed herewith are the medical prescriptions.

A26 - WALK IN PASCHIM VIHAR II

|---------------|----------------|---------------|---------------------|
| Name | Mrs. ANITA | Collected | 15/7/2022 8:59:00AM |
| Lab No. | 162686526 | Received | 15/7/2022 9:00:37AM |
| Age: 50 Years | Gender: Female | Reported | 15/7/2022 3:58:05PM |
| A/c Status: P | Ref By: CGHS | Report Status | Final |

| Test Name | Results | Units | Bio. Ref. Interval |
|--|---------|-------|--------------------|
| ERYTHROCYTE SEDIMENTATION RATE (ESR)** (Capillary photometry) | 5 | mm/hr | 0:00 - 30:00 |

Note

1. C-Reactive Protein (CRP) is the recommended test in acute inflammatory conditions.
2. Test conducted on EDTA whole blood at 37°C.

| | | | |
|---|-------|------|-------|
| ANTI CCP (CYCLIC CITRULLINATED PEPTIDE), SERUM** (CMIA) | <0.50 | U/mL | <5.00 |
|---|-------|------|-------|

Note

1. Sensitivity of this assay is 70.6% and specificity is 98.2%
2. Specificity of Anti CCP antibodies in Juvenile arthritis patients has not been established

Comments

Anti CCP antibodies are useful for evaluating patients suspected of Rheumatoid arthritis. Positive results occur in 60-80% of Rheumatoid arthritis patients depending on disease severity. The positive predictive value of Anti CCP antibodies for Rheumatoid arthritis is far greater than Rheumatoid factor. False positive results are uncommon. Upto 30% patients with seronegative Rheumatoid arthritis also show Anti CCP antibodies.

Clinical Uses

- For diagnosis of early Rheumatoid arthritis - Anti CCP antibodies are detected in approximately 50-60% patients of Rheumatoid arthritis usually after 3-6 months of symptoms
- Prediction of severity of disease - Early Rheumatoid arthritis patients with Anti CCP positivity may develop a more erosive form of the disease as compared with Anti CCP negative patients
- To differentiate elderly onset Rheumatoid arthritis from Polymyalgia rheumatica and erosive SLE

| | | | |
|--|------|------|-------|
| C-REACTIVE PROTEIN; CRP, SERUM** (Immunoturbidimetry) | 8.75 | mg/L | <5.00 |
|--|------|------|-------|

Comments

CRP is an acute phase reactant which is used in inflammatory disorders for monitoring course and effect of therapy. It is most useful as an indicator of activity in Rheumatoid arthritis, Rheumatic fever, tissue injury or necrosis and infections. As compared to ESR, CRP shows an earlier rise in inflammatory disorders which begins in 4-6 hrs, the intensity of the rise being higher than ESR and the recovery being earlier than ESR. Unlike ESR, CRP levels are not influenced by hematologic conditions like Anemia, Polycythemia etc.

| | | | |
|---|------|-------|--------|
| RHEUMATOID FACTOR (RA), SERUM** (Immunoturbidimetry) | 4.00 | IU/mL | <14.00 |
|---|------|-------|--------|

X-RAY BOTH KNEE AP/LAT

Degenerative changes are seen in both knee joints in the form of tibial spiking, marginal osteophytes formation in periarticular bones and reduction of medial femorotibial joint spaces.

Visualized bones appear otherwise normal.

Visualized soft tissues are normal.

Please correlate clinically & with other investigations.

NOTE - The patient has been seen by me & my name is written above. I undertake the responsibility of documentation on this card which is as per Medical Ethics, NABH and Hospital Policy.

विशेष सलाह -

- अपने चेकअप के लिए आप अपने डॉक्टर की ओ.पी.डी. में तय दिनांक व समय पर आये। जोपातकालीन स्थिति में सरोज सुपर स्पेशलिटी अस्पताल के जेजुएलिटी में आये।
- अपनी सभी जाँच केवल सरोज सुपर स्पेशलिटी अस्पताल में ही कराये। बाहर से जाँच करायी गई रिपोर्ट के आधार पर ली गई इलाज की जिम्मेदारी सरोज सुपर स्पेशलिटी अस्पताल के डॉक्टर व कर्मचारी की नहीं होगी।
- कोई भी दवा अप्रत्याशित अभिघातक एलर्जी कर सकती है। अगर आपको भी ऐसा हुआ है तो तुरंत अस्पताल की केजुएलिटी से सम्पर्क करें।
- फोन पर अपने डॉक्टर से किसी भी इलाज की सलाह न लें बल्कि डॉक्टर को अस्पताल आकर दिखायें।
- यदि कोई भी अस्पताल का स्टॉफ आपसे किसी दूसरे अस्पताल/क्लीनिक या बाहर जाँच के लिए बुलाता है तो समझिए कि वह आपको गुमराह कर रहा है। इसकी शिकायत आप तुरन्त पी.आर.ओ. (PRO) श्रीमति रुबी गोंगा से फोन नं० 9971553077 पर करें।
