Multi-Disciplinary Child Development Report

Reg no: 2663894

Name: Abhiram Srivastava

Age: 4years 4months

Sex: Male

Date of Birth: 08-07-2015

Date of Testing: 29-11-2019

Father Name: Mr. Virat K. Srivastava

Mother Name: Mrs. Ekta Srivastava

Residence: Uttar Pradesh

Contact No: 9005011819

Email id: viratsrik@gmail.com

It was nice having Abhiram in our clinic for neurodevelopmental assessment. The multi-disciplinary team consisting of Developmental Pediatrician and Child & Adolescent Psychologist assessed the child.

Chief Complaints:

Abhiram was brought with the complaint of behavioral difficulty.

Birth History:

- Abhiram was born to prima gravida mother by NVD.
- Child was a full term baby and birth weight was 2.4 kg.
- Child cried immediately after birth.

Development History:

- Abhiram started sitting without support at 7 months of age.
- Child started to walk at 13 months of age.

Behavioral Observation: Rapport with Abhiram was formed with ease. The child wasn't fully responding to the instructions and commands. Attention could be aroused but not sustained. The following tests were conducted:

Psychological Test Findings: -

1. GESSEL'S DEVELOPMENTAL SCHEDULE: -

This test gives results in terms of Developmental Age which is DA and Development quotient DQ. Abhiram's total Developmental age is 27.28 months and DQ is 52.47.

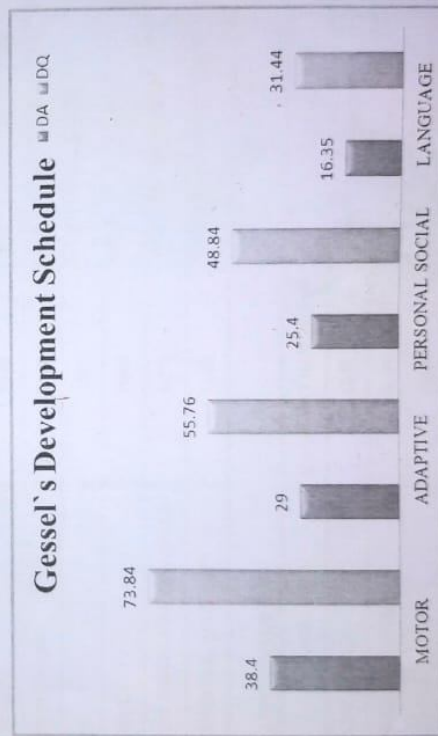

The subdivision of various areas of development is given below:

Motor Subtests: This tests the development of the Gross Motor and the Fine Motor movements. In this we test the Gross Motor functions like Neck Holding, Sitting, Standing, Walking, Jumping, Running, and Balancing. In the Fine Motor we test the Grasp, Release, Stacking Objects, Holding Pencil and Handling it. Abhiram's Motor Developmental age is 38.40 months, and the Motor DQ is 73.84.

Adaptive Subtests: In this subtest the child's ability to adapt and learn new things Symbolic Play, Imitations, Problem Solving, Object Permanence, Means End Analysis, Reasoning, Spatial Relationships, Classification and Discrimination (Cognitive) is tested. The child's Adaptive Developmental age is 29 months and the Adaptive DQ is 55.76.

Personal Social Subtests: Personal Social test consists of the social and personal skills that a child should have. In this we test the Feeding Habits of the person, Toilet Training, Dressing Styles and Habits, socialization and Play, and Developmental Detachment. Child's Personal Social Developmental age is 25.40 months and the Personal Social DQ is 48.84.

Language Subtests: Here the Child's understanding and expression of language is tested, which includes vocabulary, Speech, Response to Picture Cards, Response to color Cards, and Comprehension. Child's Language development age is 16.35 months and the language DQ is 31.44.

2. INDIAN SCALE FOR ASSESSMENT OF AUTISM:

ISAA is an objective assessment tool for persons with autism which uses observation, clinical evaluation with the subject and also information supplemented by parents or caretakers in order to diagnose autism. ISAA can be considered as an effective tool for issue of disability certificate for persons with autism in India. ISAA consists of 40 items rated on a 5-point scale ranging from 1 to 5. The 40 items of ISAA are divided under six domains as given below:

- Social relationship and Reciprocity
- Emotional Responsiveness
- Speech – Language and Communication
- Behavior Patterns
- Sensory Aspects
- Cognitive Component

This test taps on the severity of Autistic features in a child. Abhiram's Score on ISAA is 109, which falls into the "Moderate Autistic" category.

3. SENSORY PROFILE-II:

SECTION SCORES:

S.NO.	SENSORY PROCESSING SECTION	SECTION RAW SCORE	INFERENCE
1.	AUDITORY	27/40	MORE THAN OTHERS
2.	VISUAL	22/30	MUCH MORE THAN OTHERS
3.	TOUCH	26/55	MORE THAN OTHERS
4.	MOVEMENT	30/40	MUCH MORE THAN OTHERS
5.	BODY POSITION	21/40	MUCH MORE THAN OTHERS
6.	ORAL	32/50	MORE THAN OTHERS
7.	CONDUCT	29/45	MORE THAN OTHERS
8.	SOCIAL EMOTIONAL RESPONSES	36/70	MORE THAN OTHERS
9.	ATTENTIONAL RESPONSES	32/50	MUCH MORE THAN OTHERS

QUADRANT SCORES:

S.NO.	QUADRANT	QUADRANT RAW SCORE	INFERENCE
1.	SEEKING/SEEKER	80/95	MORE THAN OTHERS
2.	AVOIDING/AVOIDER	48/100	MORE THAN OTHERS
3.	SENSITIVITY/SENSOR	35/95	JUST LIKE THE MAJORITY OF OTHERS
4.	REGISTRATION/BYSTANDER	53/110	MORE THAN OTHERS
