

Building a community of concern for our children...

**Child & Adolescent Mental Health Service**

**To Whom It may concern**

**Name:** Abhiram Srivastva

**D.O.B:** 8<sup>th</sup> July 2015

**Age:** 7 years

**Subject:** Letter of recommendation for transfer to Noida

Abhiram came for assessment on July 2022. Following detailed clinical evaluation the child was diagnosed with Autism spectrum Disorder with co morbid Attention Deficit Hyperactive Disorder

Given the condition, the child requires regular medication and regular therapy which includes Speech communication and Language therapy as well as occupation therapy. The child will also benefit if he is enrolled in an integrated and inclusive school.

There are few places in the country where such services are available, Noida being one of them.

Therefore, we strongly recommend that they come to live in Noida where provisions for regular appropriate therapy, integrated and inclusive school are available.
