DISCHARGE SUMMARY

**ALL INDIA INSTITUTE OF MEDICAL SCIENCES, NEW DELHI
DEPARTMENT OF PULMONARY, CRITICAL CARE AND SLEEP MEDICINE**

Name: MOHD HANEEF
UHID No: 106800467
Date of Admission: 17.06.23

Age: 74 yrs/male
Ward: PMW/04
Date of Discharge: 28.06.23

Diagnosis

- LEFT UL MASS-CARCINOSARCOMA WITH METS TO R LL
- S/P DEBULKING ON 20/6/23
- DM
- COPD

Background history and presenting complaints

The patient is a 74 year old male , smoker with a SI of 750. He has complaints of SOB grade 2 and central chest pain since the last 2 months. He was evaluated in private for the same and A bronchoscopy and biopsy was done which was suggestive of Chondrosarcoma and he was subsequently referred to AIIMS for further management. He had persistent SOB and Dry cough at presentation to AIIMS and he was admitted for further evaluation.

On examination

Patient was conscious, oriented to time, person and place
PR: 89/min, BP: 108/72 mm Hg, SpO2: 99% on NP 4 L/MIN, RR: 28/min,
No pallor, icterus, cyanosis, clubbing, edema or lymphadenopathy
No jugular venous distension was seen
RS: Bilateral diffuse wheeze with reduced air entry on the right side.
CVS: S1S2 - Normal, no murmurs
CNS: GCS E4V5M6, no focal neurological deficit
Abdomen: soft, distended, no organomegaly, no tenderness

IN HOSPITAL COURSE

He was admitted for the above complaints and Debulking of the tumor was done under Rigid Bronchoscopy on 20/6/23. Detailed report attached, after which he had significant reduction in his symptoms. His slides were reviewed at AIIMS which are suggestive of a Carcinoma. A surgical oncology opinion was taken and he was a unfit candidate for surgery at present. Medical oncology advised that he had poor PS for systemic Chemo and Hence a RT consult was taken and was advised for palliative RT to the primary. Palliative Medicine review was taken and had advised if patient needs palliative care can be admitted in NCI Jhajjar. He needs LTOT at 2l/min and is being discharged on the same.
