POST-OP HOSPITAL COURSE:

Patient was admitted with above mentioned complaints. After thorough preoperative evaluation he underwent Coronary Artery Bypass Grafting x 4 (LIMA - LAD, RIMA - Distal RCA, LRA - OM RSVG - Diagonal) done on 12.09.2022. He was observed in CTVS ICU in the immediate postoperative period, was extubated on the first post operative day, inotropes were withdrawn gradually, chest tubes were removed and eventually he was mobilized, delined and transferred to the ward.

In the ward the patient was given rigorous chest physiotherapy, high protein diet along with all other routine activities. He developed acute pain in the left lower limb, neurology consultation was sought and was diagnosed to have sciatica left lower limb, conservative treatment was given and the patient improved symptomatically, rest of his postoperative course was uneventful. Now, he is being discharged in a stable condition.
