MPV : 10.4 fL 7.5 - 11.8

Mean Platelet Volume

MPV is important in cases of Thrombocytopenia, where a low MPV indicates towards Aplasia, high MPV indicates Immune Thrombocytopenia.

P-LCR : 26 % 0 - 100

Platelet - Large Cell Ratio

Increased percentage of large platelets (P-LCR) is observed in patients with Hyperlipidaemia and suggest possible risk of Thromboembolic ischaemic events.

BIOCHEM- LIVER FUNCTION

Sample Coll. : 15:07 Jun 20, 2023

Report Time : 17:50 Jun 20, 2023

Investigation	Result	Units	Reference Range
S. BILIRUBIN (TOTAL): SAMPLE - Serum, METHOD - DPD	6.37	mg/dL	0.40 - 13.00
S. BILIRUBIN (CONJUGATED): SAMPLE - Serum, METHOD - DPD	0.45	mg/dL	0.00 - 0.20

S. IONIZED CALCIUM*	1.13	mmol/L	1.10 - 1.40

Ionised calcium :

- Serum (plasma) calcium exists in three distinct forms : (1) free or ionised calcium (approx 50%), which is physiologically active form. (2)Complexed calcium (approx 10%), which is bound to anions (3)Plasma protein bound calcium (approx 40 %)bound to proteins.
- Alkalosis results in decrease in free calcium, Acidosis causes an increase in free calcium.

IMMUNOASSAYS- HORMONES

Sample Coll. : 15:07 Jun 20, 2023 Report Time : 17:50 Jun 20, 2023

Investigation	Result	Units	Reference Range
FREE THYROXINE (FT4)	: 19.38	pmol/L	9.14 - 23.80
Sample - Serum . Assayed using Chemiluminescence Immunoassay (CLIA)			
TSH	: 3.80	mu/L	0.45 - 4.88
Sample - Serum , Method - ElectroChemiluminescence Immunoassay (CLIA)			

Interpretation :

REFERENCE GROUP	REFERENCE RANGE IN mu/L (As per American Thyroid Association)
PREGNANCY	
1st Trimester	0.10 - 2.50
2nd Trimester	0.20 - 3.00
3rd Trimester	0.30 - 3.00

NOTE : We are doing TOTAL THYROID PANEL (Including TSH, T4, T3, Anti-TPO Antibody and Anti-Thyroglobulin (TG) Antibody);

CAUTION : TSH shows Diurnal Variation with peak levels in night, hence TSH readings are to be interpreted under proper clinical history.

- 1-Secondary hypothyroidism caused by pituitary/hypothalamic dysfunction presents with low TSH, low T3 & T4.
- 2- TSH-centered strategy has two primary limitations; First, it assumes that hypothalamic/pituitary function is intact & normal., Second it assumes that the patient is stable (i.e no recent therapy for hyperthyroidism or hypothyroidism).
- 3- Pregnancy related reference ranges for total T4, TSH and total T3.
