(A Unit of Samadhan Neuro-Psychiatric Centre Pvt.Ltd.)

Ref. No. :

Rorschach Test Report

62, Laxman Puri (Behind Kailash Kunj),
Faizabad Road, Indira Nagar, Lucknow
Ph.: 0522-2349557 (O)

Date : 23.06.06

Name: Sri Pawan Singh

Age: 23 yrs/M

Ref. By: Dr. Shashi Kant, M.D.

Rorschach Ink Blot Test was administered on Sri Pawan Singh for diagnostic purpose.

Test Report

Pt. had given total nine responses which show that his productivity is very low, he was very rigid during the administration of the test. His reality contact is very very low as he had not given any popular response. He seems pre-occupied and preferred to live in his own world. His interpersonal relationship is also not satisfactory. He had perceived white space & imag. in some protocols which reveals his suspiciousness. He had not given any human response which shows his fear and insecurity. Rigidity and aggression was also observed.

On the whole it could be said that presently the symptoms of Schizophrenia is dominant in his personality.

Dr. Shashi Kant
