Histopathology Report

Report Findings:

Received twelve blocks (labelled H/2143/17 A to Q) sent for review as "prostatic biopsy"

-Section examined shows features of a prostatic acinar adenocarcinoma in the following cores:

I. Left lateral mid-Gleason score 3+3;60% core area

II. Left lateral base-Gleason score 3+4;35% core area

III. Right medial base -Gleason score 3+4;30% core area

-Section from "(IV)left medial mid" shows high grade prostatic intraepithelial neoplasm. Perineural invasion is noted.

The following cores are free of tumor:

V. Left medial apex

VI. Left lateral apex

VII. Left medial base

VIII. Right lateral apex

IX. Right medial apex

X. Right lateral mid

XI. Right medial mid

XII. Right lateral base

Diagnosis: prostatic acinar adenocarcinoma

Overall gleason score 3+4=7

grade group II.
