Anviti

5/2y

LSCS oligo menorrhoea

Delayed walking.

Initially showed some autistic like features like restricted interests (sound make toys, sound toys), hand inspection, playing with fingers; hearing but not listening, ↓ eye contact, ↓ peer interaction.

There has been some improvement.

- Tagger
- Echolalia
- Does not speak sentences, need based, but not conversational speech
- Clapping when happy

converted ADHD.

Sleep disorder: late sleep onset midnight
