ULTRASONOGRAPHY REPORT

PELVIC ULTRASOUND [TVS]

Urinary bladder is normal in filling and contour. No calculus or wall thickening is seen.

Uterus is bulky in size anteverted. There are anterior and posterior of myometrial masses measuring 18 x 14mm and 48 x 31mm respectively. Endometrial thickness is 6mm. Endometrial echoes are normal. There is no fluid collection in uterine cavity.

Cervix is seen with few nabothian cysts measuring 4-6mm.

Right ovary is enlarged with three cystic areas of 30 x 26mm, 28 x 24mm and 35 x 30mm. Soft echoes are seen within the cyst.

Left ovary is mildly enlarged in size and seen with two cystic areas of 40 x 26mm and 51 x 33mm. Soft echoes are seen within the cysts

There is no free fluid in cul de sac.

OPINION::

1. ANTERIOR AND POSTERIOR WALL MYOMETRIAL MASSES ? UTERINE FIBROIDS
2. NABOTHIAN CYSTS IN CERVIX.
3. CYSTIC AREAS IN BOTH OVARIES WITH SOFT ECHOES SUGGESTIVE OF ENDOMETRIOSIS.

ULTRASONOGRAPHY REPORT

PELVIC ULTRASOUND [TVS]

Urinary bladder is normal in filling and contour. No calculus or wall thickening is seen.

Uterus is bulky in size anteverted. There are myometrial masses measuring 41 x 37mm - 20 x 19mm. Endometrial echoes are distorted. Endometrial thickness is 7mm. There is no fluid collection in uterine cavity.

Cervix is bulky.

There are right adnexal multiloculated cystic lesions measuring 93 x 78mm and 46 x 38mm. Right ovary is not separately seen.

There is a left adnexal cystic lesion measuring 83 x 67mm. Left ovary is not separately seen.

There is no free fluid in cul de sac.

OPINION::

1. UTERINE FIBROIDS.
2. BILATERAL ADNEXAL CYSTIC LESIONS ? Endometriosis.
